Subject: Fwd: Re: Permit Issues with comments for RM 10.9 TCRA
Passaic0313 10 9 DEP bulletpoints - for CPG with comments REV1 and dmi response.docx

Ray & Stephanie:

The attached document provides NJDEP's response to EPA's questions and the CPG's response to NJDEP's responses.

Our concern remains that NJDEP hasn't answered EPA's questions directly regarding their authority to raise issues with the CPG's applications for Tidelands and Waterfront Development applications.

We have requested that Clean Earth and Clean Harbors provide letters confirming their understanding of the RM 10.9 sediment characteristics and ability to manage them in conformance with facility permits.

Jay Nickerson has informed us that he will be out on vacation next week and that Tom Cozzi will be handling resolution of these issues. He may be a more effective person to deal the staff..

Thx,
Bill P.

Jay, thanks for putting this together. Attached are CPG comments focused on getting better delineation as to what are design issues vs what are permit equivalent issues.

Stan, Thanks for the telephone discussion today. I believe several of these issues are minor and can be easily worked out. I am

providing to you a list of the issues with comments that will assist in addressing these concerns.
